Sunita Kumari

Software Engineer — React — TypeScript — Node.js — PostgreSQL — Distributed Systems
8987736795 officialsunita1606@gmail.com linkedin.com/in/sunita-kumari1606 github.com/sunitakumari22

Professional Summary

Software Engineer with **2+ years of experience** designing and shipping scalable **multi-tenant SaaS platforms, distributed microservices, and enterprise applications** using **React, TypeScript, Node.js, Fastify, and PostgreSQL**. Proven expertise in **client-facing requirement discovery, high-throughput API design, asynchronous processing, and relational database tuning**. Hands-on experience architecting 0-to-1 systems and integrating AI/LLM data extraction pipelines.

Technical Skills

Languages: TypeScript, JavaScript (ES6+), Python, SQL, HTML5, CSS3
Frontend: React.js, Next.js, Angular, TanStack Query, Redux, Tailwind CSS, PrimeNG
Backend & APIs: Node.js, Express.js, Fastify, REST APIs, WebSockets, API Gateway, Microservices Architecture
Databases & Caching: PostgreSQL, MongoDB, Redis (Pub/Sub & Queues), Database Optimization, Indexing
Architecture & Systems: Multi-Tenant SaaS, System Design (HLD/LLD), Asynchronous Processing, RBAC, Caching
AI & Tooling: LLM Integration, Structured Data Extraction, Docker, Git, Postman, Jest, Razorpay,Easebuzz, SMTP

Experience

PyxisBlu Solutions Pvt. Ltd. **May 2024 – Present**
Software Engineer *Ranchi, Jharkhand*

- Drove on-site client discovery and full-lifecycle engineering across 5+ enterprise platforms and infrastructure services.

Multi-Tenant Fitness & Wellness Platform (0-to-1 SaaS) *Fastify, Node.js, PostgreSQL, React, WebSockets, Docker*

- **Backend Architecture & Core Engineering:** Owned 100% of the backend engineering from scratch, designing a multi-tenant SaaS architecture with strict tenant data isolation, centralized RBAC, client onboarding, and automated subscription billing.
- **Resilient Tiered Search & AI Pipeline:** Engineered a high-throughput, tiered food-search service querying local PostgreSQL cache, sequentially falling back to 3 external APIs upon cache misses, and integrated an LLM pipeline for structured data extraction with DB persistence.
- **Real-Time Communication & Frontend Integration:** Built a low-latency WebSocket service for live client-to-coach messaging and progress tracking, while contributing to key React frontend dashboards for seamless API integration.

Centralized Email & Notification Infrastructure Platform *Node.js, Express.js, MongoDB, Redis, Docker, SMTP*

- Designed a multi-tenant messaging microservice delivering RESTful APIs for transactional emails, OTP dispatch, and bulk batch processing across decoupled tenant applications.
- Implemented an encrypted credential management framework storing partner SMTP configurations securely and provisioning authenticated API keys for client integrations.
- Built an asynchronous Redis-backed message queue to ingest and process high-volume requests with zero data loss.

Enterprise Products & EdTech Suite *Angular, React, Node.js, Express.js, MongoDB, PrimeNG, TanStack Query*

- **NCore Pro University CRM (Angular, PrimeNG):** Conducted on-site client discovery to map university workflows, then owned Frontend Engineering for core modules—Finance, Examination, and Student Lifecycle—building dynamic forms, RBAC, and billing dashboards.
- **Content & Management System (CMS) (React, Express.js, MongoDB):** Re-architected a legacy HR module by redesigning system architecture and database schema following direct client consultation. Executed zero-loss data migration and delivered full-stack HR/Placement pipelines supporting **10,000+ daily transactions**.
- **School ERP System (React, TanStack Query, Tailwind CSS):** Architected administrative interfaces optimizing server-state caching with TanStack Query to eliminate duplicate API requests and improve client-side rendering speed.
- **Hotel/Hostel Booking Platform:** Drove on-site stakeholder requirement gathering to architect and deliver an end-to-end booking system handling room inventory allocation, billing workflows, and Easebuzz payment gateway integration.
- **Operational Automation:** Developed Python automation scripts for document batch compression and operational reporting, cutting manual overhead.

Education

Chandigarh University **2025 – 2027**
Master of Computer Applications (MCA) (Online) *Chandigarh, India*

Ranchi Women's College **2021 – 2024**
Bachelor of Computer Applications (BCA) *Ranchi, Jharkhand*
